

Moulage – Getting Started

An introduction course to basic moulage techniques to enhance simulation scenarios.

Upon full participation and completion of this virtual training, participants will be able to:

- Review the fundamentals and benefits of Moulage.
- Create the Moulage on simulation manikins and standardised patients.
- Apply Moulage techniques to their simulation training.
- Utilise their pre-purchased items* for future simulation sessions.

90 Minutes Virtual Instructor-Led Training Agenda

What is Moulage?	5 Minutes
Commercial vs Homemade	5 Minutes
Moulage Kit	10 Minutes
How to create homemade Moulage	10 Minutes
Wounds, Scars, Burns and Bruises	50 Minutes
Discussion and questions	10 Minutes

Educational Representative Responsibility

The Laerdal Educational Representative has multiple responsibilities during the virtual training:

- Help you understand Laerdal resources.
- Conduct an interactive agenda to optimise your understanding of Moulage and facilitate the development of your Moulage technique.
- Facilitate discussions about how Moulage can help to meet your goals.
